

TEXAS PREMIUM
GAME BREEDERS
AUCTION

**FEBRUARY 24
2024**

4:00 PM

**HORSESHOE BAY
TEXAS**

FOREWORD

Texas Premium Game Breeders would like to welcome you to our second auction. We want to thank you for your interest in our event and what we have to offer.

Our guest sellers all share a common goal, to excel in breeding exotics and trophies for the hunting and breeding industry. With this mentality, we have sourced the best genetics available and tailored our breeding to look at genetic traits for horn length, diversity, and adaptability. All animals presented in the auction have been selected based on these traits.

We want to thank our guest sellers for their consignments. We are certain you will be pleased with the outstanding animals on auction today. It is with great pleasure we offer some of the best genetics in the industry.

Sincerely,

INDEX

PREMIUM WILDLIFE AUCTIONS APP GUIDELINES

THE PWA SYSTEM EXPLAINED

DID YOU KNOW?

Our online platform is web and app-based and is available on all operating systems.

FIRST THINGS FIRST

Download the Premium Wildlife Auctions App available for iOS, Android and Huawei. Click on the button that is relevant to your mobile device or simply scan the QR code with your smart device.

DIFFERENT TYPE AUCTIONS

The Premium Wildlife Auctions platform provides you with 3 options to host your auction.

1. **Live Auction** – This is your traditional way of hosting an auction where the auctioneer closes the auction lot for lot with an audience. This method allows the bidder to bid online via live streaming in real-time or live on the floor at the auction. A countdown timer on the app indicates to the online bidder that final bids have to be placed before the auctioneer then closes the lot after the timer has run out.
2. **Livestream Auction** – Livestream auctions do not differ a lot from a Live Auction. There will be an auctioneer who still closes the auction lot for lot via Livestream, but no audience is involved at the auction. Bidding will only be done by telephone bidding or online bidding. The same principle for the countdown timer applies to a Livestream Auction.
3. **Timed Auction/Flash Sale** – This is purely an online auction. There is no auctioneer involved as it is a platform-based auction. Lots close in staggered intervals starting from a specific time and remain open for an undisclosed duration depending on the activity of each lot. There is a two-minute rule that applies. This simply means that when a bid is placed in the final two minutes before the lots closing time, the timer will extend by another 2 minutes to prevent bidders from losing out and to keep the bidding transparent and fair.

ONLINE AUCTION REGISTRATION PROCESS

The process to register online for any of the above-mentioned auction types remains the same. Simply create a user profile (one time only!) and click on 'Register to bid' for the relevant auction. You will receive a unique bidder number. Simply collect your bidder card from the registration table should you attend the auction. No paper, no scans, no waiting in line!

IMPORTANT TO REMEMBER

- Ensure your device's time settings is synced to Central Standard Time or GMT - 6 hrs.
- Always check your connectivity.
- Refresh regularly.

In case of a query please email: info@wildlifeauctions.com

DNA - MITOCHONDRIAL & NUCLEAR

A NOTE FROM PROFESSOR BETTINE VAN VUUREN:

Mitochondria are cellular organelles, outside the nucleus, and are responsible for energy generation in cells. The mitochondrial DNA is inherited through the maternal lineage, with no contribution from the father. Mitochondrial DNA is therefore a good marker to trace female lineages, and provides information about the historical origin of lineages. It can also be used to trace the number of family lineages in a specific area or population. It is the equivalent of male surname transmission in humans. Nuclear DNA is in the nucleus of cells. It contains coding and non-coding DNA, and is packaged as chromosomes (in antelope, there are typically 60 chromosomes per cell). Nuclear DNA is passed on from both the mother and father; with an offspring related to each parent by 50%, (full siblings are related to one another by 50%). Nuclear DNA provides valuable information about parentage and relatedness, and reflects the membership of a specific individual to different genetic groups (i.e., whether an individual is admixed, or pure within a specific genetic group). Mitochondrial and nuclear DNA, either singly or in combination, provide valuable information that can assist in the selection process. Various strategies present themselves, but it is crucial that the breeder makes a decision early on in the selection process, and then adheres to it throughout the breeding program; otherwise, there will not be any real progress towards a specific end goal. For example, a breeder may decide that high levels of genetic diversity and variation is crucial in the management of specific herds. It would then be important to maximize the different lineages included in the breeding core, which would include animals from across the range of the species. A typical nuclear result may take the form of 20% Eastern, 50% Zambian, 30% Southern, with mitochondrial membership to any of the genetic groups. At the other side of the breeding-strategy spectrum, a breeder may decide on pure populations. Here, the mitochondrial result will indicate the historical origin of the maternal lineage, while the nuclear result should indicate membership within only a single genetic group, preferably the same group as the mitochondrial result. A typical result may take the form of 90% Zambian, with mitochondrial membership also in the Zambian, or Wes Zambian group (indicating a pure Zambian, or Wes Zambian animal). All, or the overriding majority of animals in the core breeding group, should follow these results. It is important that breeder keep in mind that some calves may show unexpected membership to non-selected groups. This is common and it reflects ancestral polymorphisms, also known as old blood. A grandparent, or even great grandparent, may have had membership to a different group (this is natural, and we even see these results in wild animals naturally occurring in areas).

BRANDON LEER

AUCTIONEER
LICENSE #: 18338

I was born in Port Elizabeth, South Africa in 1964 and currently live in Pietermaritzburg South Africa. I am married to Monique who is a qualified dietician. My son Cameron, recently graduated from Hartpury University in the UK with an honours degree in Agriculture. My daughter Jessica, is studying second year Nutrition at Winchester University in the UK. My career as an Auctioneer, started in 1988 after I graduated from Agricultural College, with a company entrenched in livestock auctions. Livestock and Wildlife auctions formed the major part of my business and in 1992, I began to specialise in the auctioning of pedigree and seed stock animals. To date, I have conducted more than 1 500 auctions throughout South Africa and its neighbouring states, selling mostly Large and Small Livestock, Wildlife and Thoroughbred Racehorses. There have been many highlights in my very enjoyable career. However, selling a Cape Buffalo Bull by the name of Inala, must stand out as the greatest highlight so far. I sold him for a record price of approximately \$11 million.

GUEST SELLERS

Star S Ranch has been a premier hunting destination in Texas and an attraction to people all over the USA and neighboring countries since it was founded in 1996. The ranch covers over 14,000 acres of land and is near Mason, Texas in the heart of the Texas Hill Country, with the James River and Blue Mountains forming part of the ranch. Star S Ranch has also established breeding facilities in Fannett, Texas where multiple species are bred and adapt to the wet climate conditions. Over the past two decades, we have had one goal in mind; to breed excellent trophies for the hunting market. With this mentality, Star S Ranch has sourced the best genetics available and tailored our breeding program to look at genetic traits for horn length, genetic diversity, and animal adaptability. Our breeding programs have intensified over the past decade while implementing our experience in breeding big whitetail deer and acquiring the best knowledge and skills for our exotic game breeding practices. We have selected some of the best genetics Star S Ranch has to offer for this auction.

Located in Valley Mills, TX, Hatada Ranch was founded in 1987 when the first super exotic stepped foot on the 1,200 acre ranch. Through hard work and dedication from Doug Dutschmann and his family, Hatada Ranch now sits on over 2,000 acres of the most excellent terrain. Along with his sons, Courtlin and Catlin, Doug was able to expand the herd into 20+ exotic species. By allowing the large herds to roam freely throughout the ranch, plant spring and winter plots, provide year-round supplemental feeding and quarterly worming, it is apparent that health and consistency are key! State-of-the-art irrigation systems and lush vegetation help to provide each species with the proper terrain. Hatada Ranch prides itself on being a family-oriented ranch that specializes in giving you exotics with superior genetics.

Sola Fe Ranch is founded by native Texan Colby Stephens and headquartered in Lockhart, Texas. Colby has been in the exotic industry for 30 years capturing, consulting and breeding top quality exotic and fallow herds. Exotic herds we specialize in are Fallow, Sable, Bongo, Kudu, Impala, Dama Gazelle, and Scimitar Horned Oryx. We have been leading the way in the Fallow industry since 1998 when Colby started running a fallow meat operation, which quickly shifted to focus on antler growth. Now, with over 20 years of a closed herd and the right breeding decisions, we consistently produce the biggest fallow bucks. Not only do we boast the current SCI world record and numerous other gold medal deer, our breeding stock is highly sought after. This is where all the BIG bucks come from! We have been building top quality super exotic herds with genetic lines from top breeders of each species.

At DC Ranches, we began raising exotics approximately 10 years ago and selected the highest quality genetics to establish our herds. We take great pride in offering superior genetics through our closely monitored animal breeding program and offer high quality service to our customers. We currently have 11 species on our Dripping Springs ranch including Addax, Bongo, Dama Gazelle, Grant's Gazelle, East African Impala, Kudu, Nile Lechwe, Nyala, Roan, Sitatunga and Springbok. We have additional African species available on our sister ranch, Dos C's, in Mountain Home, including Arabian Oryx, Blackbuck, Blesbok, Gemsbok, Nubian Ibex, Sable, Scimitar, Waterbuck and Wildebeest. We designed our pastures for the co-mingling of certain species and our herds are healthy, well fed and cared for under daily observation.

GUEST SELLERS

4 Christ Ranch is in the hill country seven miles outside of Junction, TX. In July of 2021, we bought this ideal property with the vision to expand our breeding herds on more natural pastures. 4 Christ Ranch gives all glory to God for the 818 acres of fertile land. We have Klein and love grass, both native to Africa, along with some other native grasses allowing our herds to graze and live as naturally as possible. 4 Christ Ranch's goal is to continue to breed with some of the best genetics the great state of Texas has to offer and can provide the quality you are looking for to benefit your breeding program.

Located in Deep South Texas, in the county of Duval, sits the Silverhorn Ranch. The ranch spans over 10,000 acres of brush country. Through years of management and manipulation, the Silverhorn boasts a variety of habitat types that provide an optimal environment for native and exotic species alike.

The Silverhorn Ranch prides itself in operating an animal breeding operation that focuses on high quality animals and customer service. We are raising animals to thrive in the harshest of Texas climates. Silverhorn currently has 12 species of breeding herds which consists of Cape Buffalo, Black Sable, Greater Kudu, Nyala antelope, Southern Impala, Grants Gazelle, Grevy's Zebra, Gemsbok, Nilgai, Scimitar Oryx, Axis, and Blackbuck.

The Silverhorn Ranch can provide the quality animals and integrity you are looking for.

In 2017, the dream of two brothers, Shane and Brent, came to life as they embarked on an extraordinary venture - the establishment of a Super Exotic wildlife breeding ranch, J Bar J Ranching Operations. Nestled in a pristine Hill Country landscape, their ranch has quickly gained recognition for its commitment to breeding and preserving superior genetic traits. J Bar J has curated a collection of extraordinary Super Exotic wildlife and it has become the hallmark of their establishment.

Their commitment to on-property as well as remote partnership herds has showcased a unique approach to conservation but also established the ranch as a beacon of collaboration in the pursuit of preserving and enhancing the superior genetic diversity of some of the world's most extraordinary species.

Better known as "Red Gate" for its colorful entrance 15 miles north of Edinburg. La Coma ranch embraces a history as boldly painted as its nickname. The ranch started in 1883 as 130,000 acre tract of land purchased from King Ranch by Rhode Islander William Frederick Sprague; it remains perhaps the only large holding ever sold twice by the King Ranch. Today Calvin and Marge Bentsen own and run the ranch. Both are avid big game hunters but have turned their passion for hunting into conservation efforts through breeding. What used to be pasture for Santa Gertrudis and Bramham cattle is now home to over 26 different exotic species from Africa, India and Asia. At La Coma Ranch we strive to breed with the best genetics and all of our animals are on large tracts of land. We look forward to helping all of our clients improve their genetics so they can be enjoyed by many generations to come!

TERMS AND CONDITIONS

Registration:

Prior to bidding, all prospective buyers must register and receive a bidder number. Buyer must indicate method of payment at time of registration. By registering as a buyer, the buyer agrees to the terms and conditions of the auction.

Description and Guarantee:

Unless otherwise indicated the pictures provided may not be the exact animal and are indicated as such by "Example of animals" but they are equivalent representations of the animals you will receive.

Bidding:

Each auction lot will be sold to the highest bidder, as determined by the auctioneer. Buyers are bidding per piece to take the lot, unless where explicitly stated otherwise by the Auctioneer or in the auction catalog. All goods sold by auction will be subject to a reserve price, unless specifically stated otherwise by the auctioneer conducting the auction

Bidding Disputes:

In the event of tie bids (bidding disputes), the auctioneer will settle any such disputes and his decision will be final. Once the auctioneer says "SOLD," a contract is created solely between the seller and buyer. A bidding sheet will be submitted to the buyer for their immediate acknowledgment and signature.

Announcements:

Announcements from the auction block will take precedence over printed material, including the auction catalog and any other printed or digital material.

Online Bidding:

This auction will be simulcast on the internet by DVAuction as a convenience. Online bidding will be available through DV Auctions and the Premium Wildlife Auctions app. Online bidders agree to be bound by not only these auction rules, but any applicable rules pertaining to the online bidding method the bidder is using. Online bidders agree that due to the nature of internet connections, the best way for acceptance of a bid is to be present at the auction. Texas Premium Game Breeders and their guest sellers will not be liable for loss of connection and/or technical difficulties. In the event of technical issues, please contact DV Auction directly at (402) 474-5557.

TERMS AND CONDITIONS

Settlement:

All accounts are due the day of the auction. Payment methods include cash, check, wire transfer or credit card. A handling fee of 3% will apply to credit card purchases.

Transfer and Possession:

The buyer will take possession only when full payment is received. All risk will carry over to the buyer once the animal/animals are safely loaded onto the buyers transport. Texas Premium Game Breeders and their guest sellers agree to maintain, in good condition, the animals purchased in this auction until full settlement is made and the animals purchased in this auction have been loaded onto the buyers transport.

Delivery and/or transport of the animals and any associated costs are solely for the buyer's account.

Liability:

All persons who attend this auction do so at their own risk. Neither Texas Premium Game Breeders, its guest sellers, auctioneer, nor employees assume liability, legal or otherwise, for any accidents which may occur.

Contract:

The above terms and conditions shall constitute a contract between the purchaser and seller of each animal and/or lot sold. By entering a bid, any prospective buyer binds himself or herself to these Rules of Auction, as well as any special conditions of sale set forth in the auction catalog.

AUCTION POLICIES

We are both buyer and seller friendly. Satisfaction of both parties is our measure of success. A bid is valid until livestock, consignment or lot/draft is sold or auction closes. Submission of a higher bid by another party does not withdraw previous bids.

PAYMENT FOR LIVESTOCK/CONSIGNMENT OR LOT/DRAFT BY PURCHASER
DV AUCTION, INC. IS A BROADCAST & LISTING AGENT ONLY AND DOES NOT ACT AS A LIVESTOCK DEALER, LIVESTOCK MARKET, CLERK, SALE MANAGEMENT OR SELLING AGENT AND IS NOT RESPONSIBLE FOR ANY FINANCIALS OR GUARANTEES. CONTRACT FOR THE SALE IS BETWEEN THE BUYER AND SELLER.

Purchaser may be required to wire the purchase amount to the Seller's bank.
Purchasers may be required to provide the Seller with a valid credit card and agree to debit said card for purchase amount.

No Warranties.

We provide our service "as is" and without any warranty or condition, express or implied. To the maximum extent permitted by applicable law, we specifically disclaim the implied warranties of title, merchantability, and fitness for particular purposes. All warranties expressed or implied are between Buyer and Seller.

Limit of Liability.

In no event shall we be liable for lost profits or any special, incidental or consequential damages however arising, including negligence, arising out of or in connection with a sale made through this website.

AUCTION RULES

THE FOLLOWING RULES ARE SPECIFICALLY APPLICABLE TO AUCTIONS

Buyers:

If you have the highest bid, you are obligated to complete the transaction. Bids are not retractable. Every transmission over the Internet travels a different route and can be delayed by a variety of factors, including the bidder's own computer.

The time lapse between submission of a bid and its registration by the website can vary by several seconds resulting in the possibility of your bid being taken at a higher price than you intended. Do not submit bids during a flurry of bidding activity. Wait until bidding activity has subdued before placing your bid.

High speed Internet access (ie: dsl, cable, T-1, wireless) is required to bid at live auctions. DO NOT BID if you do not have high speed Internet access. See the support page under internet connection requirements.

Bids are queued by the dvauction.com host computer in the order received. Bid positions are awarded on a first come, first serve basis. In the event of malfunction by the dvauction.com host computer, it is the Auctioneer's sole discretion to continue or stop the sale during any internet outages, service disruptions or downtime.

If the malfunction has not affected the sale of lots sold prior to the malfunction, they will be considered sold. Bidding will be open with no bid positions awarded upon resumption of the auction.

It is the buyer's responsibility to ensure that their internet connection and computer are working properly. DVAuction Inc does not guarantee that online services will be uninterrupted. Any malfunction by the buyer's computer or Internet service provider is not the responsibility of DVAuction, Inc.

AUCTION RULES (BUYERS)

Submission of a bid is a binding offer to purchase livestock, consignment or lot/draft.

A bid is valid until livestock, consignment or lot/draft is sold or auction closes. Submission of a higher bid by another party does not withdraw previous bids. Auctioneer shall be the sole judge in determining the winning bidder in the event of a tie bid. It is solely the responsibility of the buyer to verify liens and guarantees.
